Findings Part One

Use this as a speaking guide, not a script to memorise. Keep the meaning, but say it in your own natural voice.

SLIDE 13

Six themes emerged

The analysis produced six themes. The first three explain how participants entered coaching, became more engaged and began to understand leadership as a complex role. The next two show growth in emotional awareness and personal responsibility. The final theme reveals the main limitation: the managers still found it difficult to use their new awareness to support the growth of other people.

SLIDE 14

The coaching context

At first, many participants found coaching strange or uncomfortable. They were not used to talking deeply about themselves, and some felt the discussions were going in circles. With time, they began to connect workplace conflict with their own behaviour and communication. What first felt uncomfortable gradually became useful. This tells us that learning started when they stopped avoiding the discomfort and began reflecting honestly.

SLIDE 15

Engagement in the leadership role

The second theme concerns engagement. Many participants felt more comfortable with financial tasks because people problems were less predictable. Some avoided difficult conversations or focused on administrative work instead. During the coaching, they started giving more attention and energy to people issues. The change was gradual. The article notes that meaningful engagement often became visible only after several sessions.

SLIDE 16

Understanding role complexity

The third theme is understanding the difference between management and leadership. These managers were successful in technical work, and their performance systems rewarded individual targets. Coaching helped them see that leadership depends on results achieved through other people. Relationships cannot be handled like financial tasks. The participants understood this difference, but they still needed practice and continued support to respond effectively in real situations.

HANDOVER

Finish calmly, pause, and hand over to Tahmina Ghaffar.
